__Installing Updates without the Notification__

do this to fix Kodi. If no notification was received then this will not change anything

-Go to Prime Wizard and see if your build is out of date.

1. Prime Wizard
2. Builds
3. If there is a new version available it will appear in red
4. Update if you wish to get new working apps

In Kodi

Got to **"PROGRAMS"**

then select **"Prime Wizard"**

Enter the **Pin (5781)**

Select **"(PRIME)Builds"**

Select **"Fresh Install"**

Select **"Continue"**

Watch to see **"Clearing Files"** then **"Downloading"** then **"Installing"**

After Installing has completed Select **"Forced Closed"** and you are done
