

## Download STB Emulator

- Laptop/Computer to USB [IPTV Apps – Prime IPTV](#)

OR

- you can download the app through the web browser on the android box  
(you may need a keyboard remote to do this, or you will need to switch to the cursor on your remote)

1. Go to a web browser Google Chrome / any that is installed on the box
2. type in the url: [www.primeiptv.ca/iptv-apps/](http://www.primeiptv.ca/iptv-apps/)
3. click on STB emulator to download
4. Install
5. Go to all apps - open STB emulator

OR

Go to the app store on your box and buy the pro version for \$6  
-the free version has ads

## Setting up STB Emu - Portal URL

1. Go to STB Emulator
2. Hold OK/Select / menu button – pulls up menu in top right
3. Settings - click OK/Select it
4. Profile – go down to profile click OK/select
5. Add New
6. Go to Portal settings
7. Portal URL
8. Change it so it reads <http://ok3.se>
  - Click on it, click the down arrow twice and it will bring you to the right of the URL, then just delete to <http://> and type in [ok3.se](http://ok3.se)
  - Remove the keyboard on screen by hitting the back button, go to OK on the screen to save it
9. Go to STB Configuration
  - write down the MAC address – you will need to give us this, so we can activate the box
11. Exit out of settings - keep pushing the back button
12. **Reload profile – Exit settings, hold ok-menu top right, go down to profile, select ok3 OR go to Exit and go back into the app OR power cycle box**

**You will need to reload the app for it to work**
